

HN-T16A

High-speed centrifuge is for measuring specific product values of blood cell and separating micro blood and solution. High quality plastic, microprocessor, high speed and efficient, safety lid lock.

Specification:

LED display, brushed motor

Speed: start-16000 rpm step less regulation

Capacity: 1.5ml×12, 0.5ml×12 or 5ml×8

Max RCF: 17000xg

Timer: 0-30min
