

DT-500

Name: DT-500 Digital Thermostat

Product description:

The thermostat can be used for a variety of temperature control applications, such as to the greenhouse, heated winter garden or Cooling, as well as the aquarium water temperature monitoring, breeding, soil temperature control.

Easy to operate with any power Hot pad or other heating or cooling device is connected, not more than 3000W of heating power.

Specification:

Model	DT-500
Measuring range	-50~99°C
Accuracy	±1°C
Resolution	1°C
Control Range	0~40°C
Max. breaking capacity	3000W
Max. switching current	16A
Power Supply	230V/50~60Hz
Dimensions	150mm×90mm×37mm
Weight	43 0g
