

JC-1A Manual Winch

Summary

The instrument is mainly used for borehole determination in mining, hydrology, borehole of concrete pile. It uses a motor to pull cable.

I. Technical Specifications

1. If using three cores plastic sheath cable of $\Phi 5.6\text{mm}$, it can wind 500m cable. Total cable tension is 200 kg;
2. If using seven cores rubber sheath cable of $\Phi 11.3\text{mm}$, it can wind 120 m cable. Total cable tension is 350 kg;
3. If using four cores sheathed cable of $\Phi 4.76\text{mm}$, it can wind 700 m cable. Total cable tension is 1000 kg;
4. If using seven cores plastic cable of $\Phi 6\text{mm}$, it can wind 500 m cable. Total cable tension is 300 kg;

II. Dimension and weight

600×500×700mm, 15 kg
